

Internship Completion Letter for Mahdi Chaabane

Seattle Washington, USA October 10th, 2025

To Whom It May Concern,

This is to certify that Mahdi Chaabane successfully completed his internship at Reality from June 15, 2025, to September 1, 2025, where he worked as a Frontend Engineer on our B2B web application.

Mahdi played a key role in developing the React-based frontend and contributing to the Backend-for-Frontend (BFF) layer. He built some of our most technically complex and innovative features, including the tournament flow, which automatically creates tournaments, generates match draws and brackets, and schedules games across fields. He also implemented the sign-up flow, including Google Maps integration.

Mahdi's ability to handle challenging technical problems with creativity and precision made him an invaluable member of the team. He completed his internship with distinction and left an excellent reputation among his peers.

Sincerely,

Ali Bakabas

Founder & CEO, Reality
